Product Description:

ENDACERE Admixture developed by Concrete Moisture Solutions Concrete Enhancement Technology (CET) together with chemical and concrete experts enable project teams to utilize the enhanced properties of ENDACERE acid inhibiting applications. As an admixture, it is integral to the concrete, *not surface applied*, and its use will render the concrete impermeable, eliminating the need for surface sealers and coatings. ENDACERE provides corrosion, shrink and ASR inhibiting properties along with increased strength in an acid environment formulation.

ENDACERE Admixture is a very unique, antimicrobial, VOC free formulation specifically designed to reduce overall concrete permeability. It combines with pre-existing elements inside the mix and initiates a natural chemical reaction that disrupts the integral concrete pore structure and capillary system; which is the route of moisture and chemical intrusion in concrete. This chemical reaction creates abundant C-S-H (calcium silicate hydrate) which forms a permanent barrier (capillary break) that is insoluble and irremovable.

Advantages:

By closing the capillary system ENDACERE Admixture facilitates suspended hydrating moisture that is irremovable yet available for sustained cement particle hydration. Therefore, the use of ENDACERE Admixture results in concrete that is denser, stronger, with increased abrasion resistance, reduced slab warping, and significantly reduced shrinkage, permeability and acid penetration.

Technical Data:

Appearance: Translucent Green
Odor: Musty
Flammability: None
Specific Gravity: 1.2302
Ph: 11.3
Solvent: Water
Weight: 10.4 lbs/gal (net)
Freeze Temp: 32°F
Storage Temp: Above 36°F
Shelf Life: One Year
Acid Resistance: Excellent
Hazardous Vapors: None
Toxicity: None
Installation: All structural concrete
Capillary Break: C-S-H
NSF / ANSI 61 Compliant

Minimum slab thickness for use with ENDACERE Admixture is three (3") inches.

Dispensing:

- ENDACERE Admixture must review ALL mix designs;
- ENDACERE Admixture is compatible with both normal and lightweight aggregate mix designs
- Dosage rate is 14oz per 100 lbs. of total cementitious materials; dose within plus or minus 3%
- ENDACERE Admix is used in a one-for-one replacement of mix water
- Standard water-cementitious material ratio (w/cm) is 0.31 to 0.53; below or above may require adjustment by ENDACERE Admixture
- ENDACERE Admix should be added separately from other admixes at the tail-end of the load and can be dosed with the tail water.
- For accuracy and reporting, ENDACERE Admix recommends dosing at the batch plant; however, dosing onsite is of course acceptable; if this is done, let drum rotate for 7 minutes before discharge

Concrete Performance:

- ENDACERE Admix is not an accelerator or a retarder
- It has little to no impact on set times per ASTM C494 testing
- It has minimal impact on slump (not more than 0.5" loss)
- May be used with all other admixtures provided that such admixtures are added separately and the combination has no deleterious effect on the concrete. with the exception of shrink reducing admixes (SRA) and crystalline growth admixes.
- Use of water reducing admixes is recommended to achieve slumps greater than 4"
- With ENDACERE Admix there is reduced bleed water, creating a richer, creamier, undiluted paste and therefore facilitating finishing operations

Curing:

ENDACERE Admixture concurs with the recommendation of ACI 302.2R-06 guidelines for curing. Curing compounds have no deleterious effects on the performance of ENDACERE Admixture.

***Warranty:**

ENDACERE Admixture is formulated to eliminate the permeability of concrete. ENDACERE warrants that ENDACERE products are free from manufacturing defects and comply with the specifications given in their respective technical data sheet. Because conditions of use, such as site conditions, surface preparations, workmanship, concrete ingredients, weather, structural issues and other factors are beyond the control of ENDACERE, no warranty can be given as to the results of use. Purchaser agrees to seek the advice of qualified professionals and to determine for themselves the suitability of the products for their intended purpose and assumes all risks. Purchaser's sole remedy is limited to replacement of any product proven defective or at ENDACERE's option refund of the purchase price paid. THIS LIMITED WARRANTY CONTAINS THE ENTIRE OBLIGATION OF ENDACERE. NO OTHER WARRANTIES, EXPRESS OR IMPLIED, SHALL APPLY INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. ENDACERE SHALL NOT BE LIABLE UNDER ANY LEGAL THEORY FOR SPECIAL OR CONSEQUENTIAL DAMAGES. No representative of ENDACERE has the authority to make any representations or provision except as stated herein. ENDACERE reserves the right to change the properties of its products without notice.
